UNITED STATES DEPARTMENT OF AGRICULTURE WAR FOOD ADMINISTRATION

Washington, D. C.

December 1943

ANNUAL REPORT ON TOBACCO STATISTICS, 1943

Prepared by

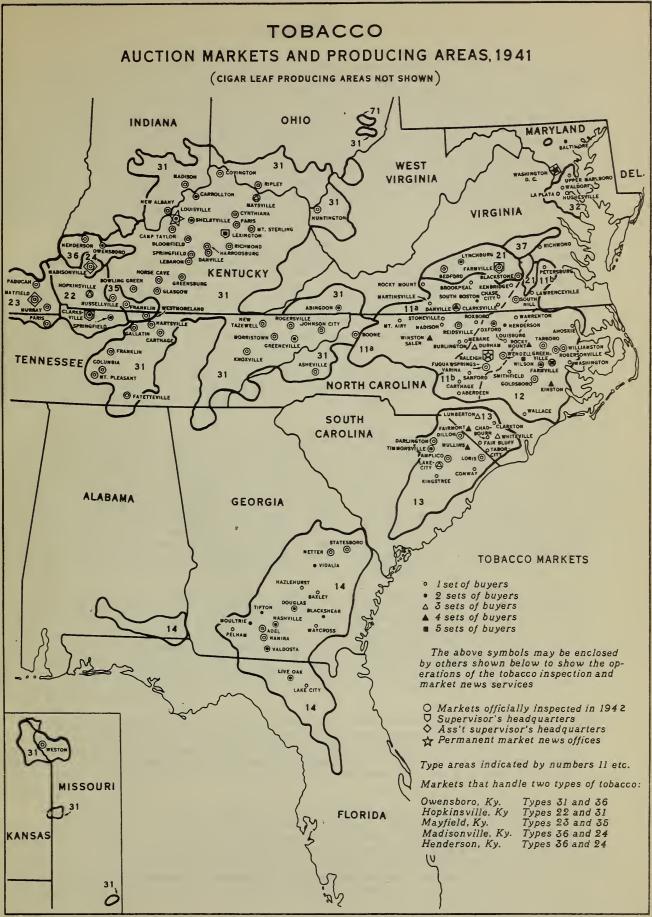

the

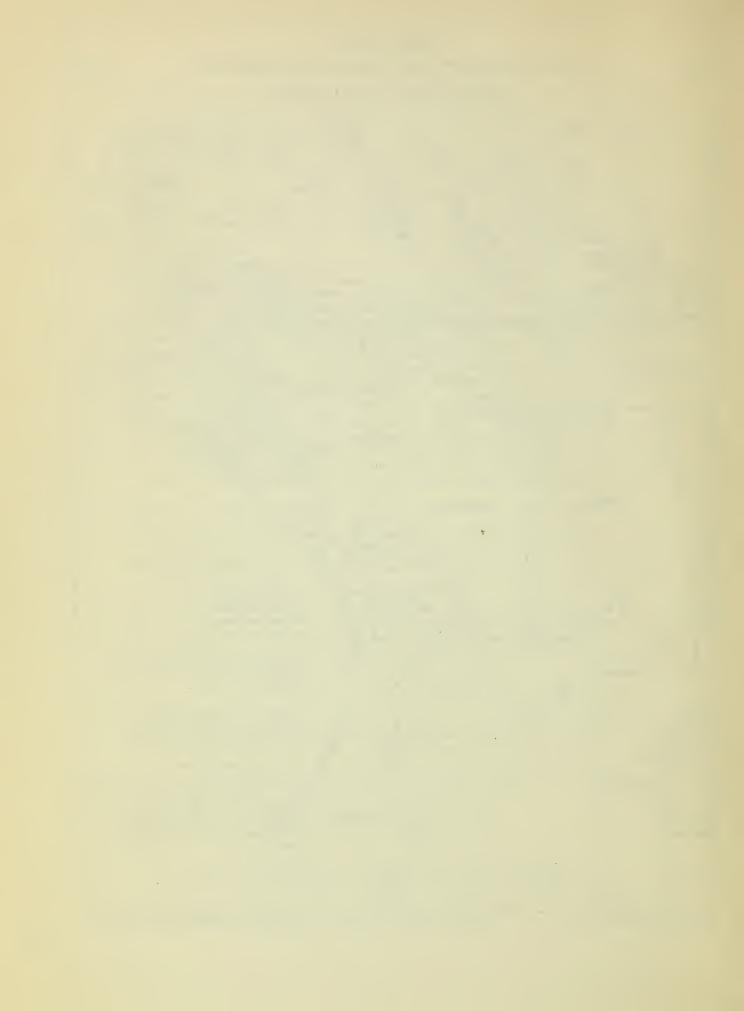

Food Distribution Administration

This is the eighth in a series of annual reports on tobacco statistics authorized and requested by Congress on August 27, 1935. The first three are United States Department of Agriculture Statistical Bulletins 58, 63, and 67, and the fourth, fifth, sixth, and seventh are processed publications. All are obtainable from the Food Distribution Administration, War Food Administration, Washington 25, D. C.

TABULAR MATERIAL

able	-	rage
1.	Acreage, yield per acre, production, price per pound, and crop value, total, by classes, by types, and by types within States, 1938-42	5
2.	Acreage, yield per acre, production, price per pound, and crop value, by States	13
3. 4.	Production in specified countries, 1938-42	16 17
5•	Producers' sales, value, and average price, by types and markets, for leaf sold at auction, crops of 1941 and 1942	18
6.	Country sales in Types 22 and 23, 1929-42	23
7-	Ranges of bids on auction markets, by types, in effect 1942-43 season	23
g.	Total stocks of unstemmed and stemmed leaf owned by dealers and manufacturers, quarterly, 1938-42	24
9.	Stocks of leaf, by types as reported and on a converted weight basis, owned by dealers and manufacturers, quarterly, 1938-42	25
10.	Conversion factors for adjusting for losses in weight incident to stemming, handling, sweating, and drying all types	39
11.	Stocks of leaf, by types and groups of grades, combining unstemmed and stemmed, quarterly, 1938-42	40
12.	Stocks of Burley, by groups and qualities, combining unstemmed and stemmed, quarterly, 1938-42	54
13.	Stocks of miscellaneous domestic, by types as reported, combining unstemmed and stemmed, owned by dealers and manufacturers, quarterly, 1930-42	56
14.	Stocks of foreign-grown cigar-leaf, by types as reported, combining unstemmed and stemmed, owned by dealers and manufacturers, quarterly, 1930-42	57
15.	Stocks of foreign-grown cigarette and smoking, owned by dealers and manufacturers, as reported, combining unstemmed and stemmed, quarterly, 1930-42 -	58
16.	Byproducts diversion program of the Food Distribution Administration for dark types, fiscal year ended June 1943	58
17.	Purchases, loans, and releases, of the Commodity Credit Corporation, as of October 30, 1943	59
18.	Purchases of leaf tobacco and tobacco products for shipment under lend-lease, to October 30, 1943	60
19.	Production, stocks, supply, disappearance, and price, by types, 1938-42	61
20.	Per capita consumption of products, 1938-42	63
21.	Wholesale prices of products, by months and annual average, 1938-43	64
22.	Retail prices of products, average in 32 cities, quarterly, 1938-43	65
23.	Establishments, wage earners, wages, costs, and value of products, in the manufacturing industries, 1931-39	66
24.	Leaf used in the manufacture of cigars, cigarettes, and tobacco and snuff,	67
25.	Cigars, cigarettes, chewing, smoking, and snuff manufactured, 1937-41	67
26.	Tax-paid withdrawals of large cigars, by months, 1941-43	68
27.	Rates of Federal tax on products, as imposed by the Internal Revenue Acts of 1926 and 1942	72
28.	Tax-paid withdrawals of products other than large cigars, by months, 1941-43	73
29.	Receipts from Federal taxes on products, 1939-43	75
30.	Rates of City tax on products, in effect May 1, 1943	75
31.	Rates of State tax on products, in effect May 1, 1943	75 75 76
32.	Receipts from State taxes on products, 1939-43	79
33•	Tariff rates on leaf and products imported into the United States; established by the Tariff Act of 1930, and subsequent changes	80
34.	Foreign import duties on United States leaf in principal importing countries,	82
35•	Revenue freight originated, leaf, quarterly, 1938-42	83

INTRODUCTION

Wartime marketing problems dominated the 1942 tobacco crop year. The former surplus of cigarette leaf diminished rapidly with the increasing demand for cigarettes. The ensuing strong leaf markets were placed under price ceilings, which resulted in auction market allocations and an international allocation of flue-cured. Dark tobacco markets were greatly strengthened by increasing Government diversion of low grades needed for nicotine insecticides. Cigar-leaf markets were stronger, although production problems of manufacturers, particularly in regard to labor shortages, forced some decline in cigar withdrawals in spite of increased consumer demand. For most products, increased purchases for the armed forces were a notable factor in the increased demand. Increased crop goals were set for 1943 and again for 1944 by the War Food Administration, and marketing quotas on the 1944 crop were dropped for all types except flue-cured and Burley, 20 percent increases being allowed in the farm marketing quotas and acreage allotments for these types. Flue-cured and Burley growers approved a 3-year extension of marketing quotas, to begin with the 1944 crop.

The 1942 tobacco crop sold at the highest average price on record, and brought to growers the largest gross income ever received for a tobacco crop. The average price received for the entire crop was 36.9 cents per pound, and returns to growers were nearly 520 million dollars. The 1942 average price was higher by 10.5 cents, or nearly 40 percent, than the 1941 average, and higher by 20.9 cents, or 130 percent, than the 1940 average price. Prices of all types in all States were higher than those of the 1941 crop, the increases ranging from ½ cent to 26.4 cents per pound. Returns to growers were 56 and 122 percent higher respectively than the values of the 1941 and 1940 crops, and 15 percent higher than the receipts of 451 million dollars for the 1919 crop, which sold for the highest amount previously received by growers for an entire crop. Production of all types totaled 1,409 million pounds for the 1942 crop, compared with 1,262 million pounds grown in 1941. This is an increase of 147 million pounds, or 12 percent over 1941, but about 103 million pounds, or 7 percent, lower than the average production for the 5 years, 1937-41, of 1,512 million pounds.

Flue-cured tobacco of the 1942 crop totaled 812 million pounds, 162 million pounds more than the 1941 crop of 650 million. The 1942 average of 38.4 cents per pound was 10.3 cents higher than the 1941 average, and the highest price reported for flue-cured tobacco since 1919 when growers received 44.4 cents for the crop. The Office of Price Administration placed ceilings on prices of flue-cured leaf on auction floors, through a temporary regulation effective August 31, 1942, which was followed by a permanent regulation issued September 22, 1942. Under the latter regulation, the season average of an individual purchaser could not rise above that purchaser's average for the base period August 24.28. The general market average for all flue-cured during this period was 34.86 cents, and if any individual purchaser's average for the base period was lower than the 34.86 general average, or if he were not in the market during that time, he might take as his ceiling 34.86 cents. Purchases by the Commodity Credit Corporation were exempt, as were also purchases for resale and for export.

The Burley crop of 1942 was about 7 million pounds larger than the 1941 crop, and sold at an increase in price of 12.6 cents per pound. The 1942 crop was reported as 344 million pounds and sold at 41.8 cents per pound. This is the highest price ever received for the Burley crop, the next highest price being 35.7 cents received for the crop of 1936. Price ceilings on Burley by grades were established by the Office of Price Administration, effective December 4, 1942. Under Food Distribution Order No. 4.1, effective January 8, 1943, allocations were made, under which any manufacturer or dealer was authorized to purchase for his own account tobacco of the 1942 crop in an amount based upon his average annual purchases of the crops of 1939, 1940, and 1941.

Maryland production was 28 million pounds for 1942 and sold at an average of 56.5 cents per pound, a price approximately twice as high as any ever received for this type. The only prices above 30 cents reported previously were 33 cents for the 1940 crop and 30.1 cents for the 1941 crop. The unusually high price in Maryland is attributed to an increased demand, a short crop, the anticipated still shorter crop for next year, and the deficient production in other cigarette types.

The 1942 fire-cured crop totaled 72 million pounds, about 2 million pounds more than in 1941, and the production of dark air-cured was 35 million, about 4 million pounds larger than in the previous year. Averages for these classes were respectively 17.1 and 15.2 cents per pound. All classes of cigar-leaf produced in 1942 totaled 119 million pounds, about 24 million pounds lower than the 1941 crop. Prices by types within States ranged from 11.5 cents for Ohio filler to \$1.50 for wrappers in Connecticut and Massachusetts. Average for all types was 26.1 cents per pound, compared with 20.4 cents for the 1941 crop.

Tax-paid withdrawals of tobacco products for the year ended June 30, 1943, indicated increases in consumption of cigarettes and snuff, and decreases in cigars and manufactured tobacco (chewing and smoking). Tax-paid withdrawals of cigarettes totaled 245 billion, compared with 217 billion in the preceding year -- an increase of 13 percent. The increase is actually greater than is shown from the withdrawal figures, because of the increased volume of tax-free cigarettes sent to the armed forces overseas. A total of 6,003 billion cigars were withdrawn tax-paid during the year ended June 30, 1943, about 100 million cigars less than were withdrawn during the previous year. In the cigar classifications retailing above 8 cents, a substantial increase in consumption was indicated, as withdrawals were about 300 million higher than for the previous year. However, in the low-priced classes -- those selling under 8 cents -- the consumption decreased by 400 million from the preceding year, and more than offset the increased consumption of higher-priced cigars. Increased consumer incomes and higher manufacturing costs were factors contributing to the trend toward the manufacture of higher-priced cigars. The high prices paid for the leaf made it unprofitable to utilize labor and equipment in the manufacture of low-priced products. Withdrawals of manufactured tobacco (chewing and smoking combined) were 266 million pounds for the year ended June 30, 1943, and indicate an 8 percent decrease in consumption from the previous year; however, separate data on manufacture of chewing and smoking tobacco indicate increases in most kinds of chewing, and the major part of the decrease in smoking. Snuff withdrawals were nearly 42 million pounds for the year ended June 30, 1943, only about 600 thousand pounds higher than the previous year but a record consumption for this product. Increase in the use of chewing tobacco and snuff is partly accounted for by the fact that smoking is prohibited in many industrial plants.

Up to October 30, 1943, the Commodity Credit Corporation had made purchases of 738 million pounds of tobacco, redried weight, and had made loans on an additional 214 million pounds. This latter figure includes collateral taken over from the Reconstruction Finance Corporation in June 1936, when activities on tobacco were transferred to the Commodity Credit Corporation. Of the total amount acquired, 760 million pounds were flue-cured; 162 million, dark types; 29 million, Burley; about 900 thousand, cigar-leaf; and 50 thousand, Perique. About 832 million pounds had been released, as of October 30, 1943, through the following channels: Over 200 million had been repurchased or redeemed by dealers or manufacturers, and more than 600 million sold to foreign governments and for shipment under lend-lease.

The Food Distribution Administration had contracted to purchase, up to October 30, 1943, from the Commodity Credit Corporation, a total of 485 million pounds of leaf tobacco for shipment under lend-lease. The Lend-Lease Act became effective March 11, 1941, and the first purchase was made April 28, 1941. Contracts had also been completed, as of October 30, 1943, by the Food Distribution Administration, for purchase of manufactured products for shipment under lend-lease, as follows: 2,127 million cigarettes, 900 thousand pounds of pipe tobacco, 200 thousand pounds of cigarette tobacco, 120 thousand pounds of processed leaf for direct consumption, and 700 thousand pounds of native twist chewing tobacco.

More than $22\frac{1}{2}$ million pounds of fire-cured and dark air-cured tobaccos, principally low grade, were diverted to byproducts uses under the 1942-43 Diversion Program. This consisted of $15\frac{1}{2}$ million pounds of the 1942 crop and 7 million pounds of hogshead tobacco from the crops of 1934, 1935, 1939, 1940, and 1941. Under Food Distribution Order No. 9, the sales of specified low grades of Types 22, 23, and 36 of the 1942 crop were frozen, and these grades made available only to nicotine manufacturers. The tobacco was manufactured into nicotine sulphate and nicotine alkaloid for use as insecticides. Under the Diversion Program for the previous year about 9 million pounds were diverted. Expansion of the diversion program was necessitated by higher domestic requirements for all insecticides, because of increased food production, particularly of fruit and vegetable crops.

Changes in the 1943 Annual Report on Tobacco Statistics: Several tables published in the 1942 report are not included in this report because data were not available, and in some tables revisions have been made in the presentation of the material. Since export data by countries have not been available for publication since March 1941, and data on imports and total exports, since September 1941, no tables covering these phases of the industry have been included. For earlier years reference may be made to earlier reports. The table on cash income to growers on a calendar-year basis has been omitted; table 1, however, shows returns to growers on a crop-year basis. The summary of grades of Connecticut Shade-grown is omitted, as Government grading of this type was discontinued after the delivery of the 1940 crop. Although no data on items shown in the table on manufacturing industries were collected after 1939, because of war conditions, the table is published again in this report with slight revisions in figures, and with qualifying notes. The data on tax-paid with-drawals are shown in a slightly revised form, in order to present, as nearly as possible, comparable figures on withdrawals of large cigars under both the old and new classifications. Prior to November 1, 1942, the classification in effect since November 1917 divided large cigars for purposes of taxation into 5 classes, according to retail price, and the rates in effect since 1926 were those imposed by the Internal Revenue Act of 1926. On November 1, 1942, the Internal Revenue Act of 1942 became effective, classifying large cigars into 7 classes, according to retail price, and increasing the tax rates. Both the old and new classifications and rates are shown in this report for purposes of comparison.

BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes, types, and groups)

CLASS 1, FLUE-CURED TYPES

Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.

Type 12: Eastern North Carolina flue-cured; produced in the coastal sections of North Carolina, north of the South River.

Type 13: South Carolina flue-cured; produced in the coastal sections of South Carolina and the southeastern counties of North Carolina, south of the South River.

Type 14: Georgia and Florida flue-cured; produced in southern Georgia and northern Florida.

Groups applicable to Types 11, 12, 13, and 14:

A, wrappers. B, leaf and smoking leaf.
C, cutters. X, lugs and primings. S, scrap.
N, nondescript.

CLASS 2, FIRE-CURED TYPES

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.

Type 22: Tennessee Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkinsville; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.

Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, Murray, and Paducah; produced in a section between the Tennessee, Ohio, and Mississippi Rivers in western Kentucky and northwestern Tennessee.

Type 24: Henderson Stemming or Northern firecured; produced in Webster, Hopkins, McLean, Union, and Henderson Counties of Kentucky.

Groups applicable to Types 21, 22, 23, and 24:

A. wrappers. B, heavy leaf. C, thin leaf. K, lugs. S, scrap. N, nondescript.

CLASS 3. AIR-CURED TYPES

Type 31: Burley; produced in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.

Groups applicable to Type 31:

A, wrappers. B, bright leaf, red leaf, and tips. C, lugs and cutters. X, trash and flyings. S, scrap. N, nondescript.

Type 32: Southern Maryland; produced in five counties of southern Maryland - Prince Georges, AnneArundel, Calvert, Charles, and St. Marys.

Groups applicable to Type 32:

B, heavy leaf or dull crop. C, thin leaf or bright crop. X, seconds and ground leaves. S, scrap. N, nondescript.

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.

Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.

Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

Groups applicable to Types 35, 36, and 37:

A, wrappers. B, heavy leaf. C, thin leaf. X, lugs. S, scrap. N, nondescript.

CLASS 4, CIGAR-FILLER TYPES

Type 41: Pennsylvania Seedleaf; produced in Lancaster County, Pa., and the adjoining counties.

Groups applicable to Type 41:

B, binders or tops. C, fillers (farm wrappers).

I, stemming grades. Y, farm fillers or ground leaves. S, scrap. N, nondescript.

Type 42: Gebhardt; produced in the Miami Valley section of Ohio and extending into Indiana.

Type 43: Zimmer; produced in the Miami Valley section of Ohio and extending into Indiana.

Type 44: Dutch; produced in the Miami Valley section of Ohio.

Groups applicable to Types 42, 43, and 44:

C, fillers (farm wrappers). X, stemming grades. Y, farm fillers or ground leaves. S, scrap. N, nondescript.

Type 46: Puerto Rican sun-grown (including primed (Deshojado) and stalk-cut (Mata)); produced on the Island of Puerto Rico.

Groups applicable to Type 46:

C, superior (tripas, medios, coronas, etc.).
X, inferior (pie inferior, tripa inferior,
pajizas, rezagos, etc.). Y, defectuoso (boliche,
sentido, cacho duro, amarillo, salcochado, etc.).
S, scrap (pedazos and picadura). N, nondescript
(averiado and mohoso).

CLASS 5, CIGAR-BINDER TYPES

Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.

Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.

Groups applicable to Types 51, 52, and 53:

A, wrappers. B, binders, seconds, and brokes. C, fillers and short darks. X, stemming grades. Y, sand-leaf fillers or ground leaves. S, scrap. N, nondescript.

Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River. Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River.

Groups applicable to Types 54 and 55:

- B, binders. C, fillers. X, stemming grades. Y, sand-leaf fillers or bottom leaves.
- S, scrap. N, nondescript.

Types 56 and 45: Georgia and Florida sun-grown; produced in southwestern Georgia and north-central Florida.

Groups applicable to Types 56 and 45:

B, binders. C, fillers. X, stemming grades. Y, ground leaves. S, scrap, N, nondescript.

CLASS 6, CIGAR-WRAPPER TYPES

Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

Groups applicable to Types 61 and 62:

- A. wrappers. B, stout wrappers and binders. C, fillers or tips. X, filler brokes.
- S, scrap. N, nondescript.

MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

Type 71: Eastern Ohio (flue-cured, fire-cured, or air-cured).

Type 72: Louisiana Perique.

Type 73: All domestic types of tobacco not otherwise classified.

FOREIGN TYPES

Type S1: Cuba (Havana). Type 82: Sumatra and Java.

Groups applicable to Types 81 and 82:

A, wrappers. C, fillers. S, scrap.

Type 83: Philippine Islands (Manila).

Groups applicable to Type 83:

C, fillers. S, scrap.

Type 84: All foreign-grown cigar leaf not otherwise classified.

Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

^{1/} Crop value represents production multiplied by average price per bound. The term is used to avoid confusion with "income" as shown in the multilith publication, Income Parity for Agriculture, pt. I, sec. 2.
2/ Subject to revision.

Compiled from reports of the Bureau of Agricultural Economics, Crop Reporting Board.

^{1/} Crop value represents production multiplied by average price per pound. The term is used to avoid confusion with "income" as shown in the multilith publication, Income Parity for Agriculture, pt. I, sec. 2.
2/ Subject to revision.

Compiled from reports of the Bureau of Agricultural Economics, Crop Reporting Board.

^{3/} Includes loss after harvest as a result of hurricane and flood estimated as follows in thousands of pounds: Massachusetts, 1,258; and Connecticut, 4,697. Price and value apply only to the marketable portion of the crop.

^{1/} The year beginning July corresponds most nearly to the harvesting year. For example, in the Northern Hemisphere, data for 1938 are for crops harvested in summer and fall of 1938; in the Southern Hemisphere, they are for crops harvested in spring of 1939. For many countries bordering on the Equator, data are for the harvest which started late in 1938 and continued into the early months of 1939. Countries listed in this table produce from 90 to 95 percent of the tobacco of the world.

2/ Preliminary. Figures for earlier years may be revised on basis of later information.

3/ Burma became independent from British India in April 1937.

4/ Free China.

Office of Foreign Agricultural Relations. Compiled from official sources, International Institute of Agriculture, and reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

^{5/} British India and reporting native States; Burma not included. European estate production.

1/ Estimated production of other types, by countries, is omitted due to lack of compareble data. Indications of production of other types grown in many foreign countries were published last in Annual

Compiled from official sources, reports of United States consuls, commercial attaches, agricultural attaches, and commodity specialists in foreign countries.

Report on Tobacco Statistics, 1938, Stat. Bul. No. 67, pp. 18-20.

2/ The year beginning July includes the harvesting season in both Northern and Southern Hemispheres. In Northern Hemisphere, data for 1938, for example, are for crops harvested in summer and fall of 1938; in Southern Hemisphere they are for crops harvested in spring of 1939. For many countries bordering on the Equator, harvest started late in 1938 and was completed in early months of 1939.

^{2/} Preliminary. Data for earlier years may be revised on basis of later information.

4/ Estimated.

5/ Smaller crop resulted from unfavorable weather, parasites, and disease, which destroyed much of the area set.

b) Of this amount, a portion was produced from flue-cured seed but was sun-cured.

[] Grown in Java.

[] Incomplete. Production for Cyprus, Northern Rhodesia, and the Union of South Africa, included in other years, not available for 1940 and 1941.

1/ Lawrenceville and Petersburg, Virginia, classified as 11(b) in the 1942 season, and as 11(a) in the 1941 season.

2/ In addition to total warehouse auction sales of the 1942 crop, it is estimated that 11 million pounds of scrap were sold by growers outside regular auction channels at an average of 2.88 cents per pound. Sales of scrap in the 1941 crop were estimated at 21 million pounds which sold at an average of 2.41 cents per pound.

Includes Association deliveries at advance prices.

Includes country sales.

5/ Gross sales.

Includes Camp Taylor, Kentucky.

Resales for the 1942 crop amounted to approximately 2.6 percent of gross warehouse sales; for the 1941 crop, 5.3 percent. Producers' sales for the 1941 crop are estimated.

8/ Sales of Southern Maryland tobacco occur in the year following production. Most of the tobacco sold in the 1942 season, for example, represents the crop produced in 1941. Sales represent a combination of hogshead sales on the Baltimore market and auction sales on the markets of Hughesville, La Plata, Upper Marlboro, and Waldorf. These figures are on the basis of an April-March crop year. It is believed that sales from April through March more nearly represent the crop grown in the previous year than do sales of an exact calendar year.

Compiled from reports of State departments of agriculture; trade reports; records of the Agricultural Adjustment Agency; and data obtained direct from markets and trade sources by field representatives.

Table 9.-Stocks of leaf tobacco, by types as reported and on a converted weight basis, owned by dealers and manufacturers in the United States, quarterly, 1938-42 1/ - Cont'd

2/ Figures are sums of types 22 and 23, computed separately.
3/ In October 1939 and January 1940, a conversion factor of 1.10 was applied to 350 and 400

4/ Stocks of type 41 have been revised through April 1, 1940, deducting 5 million pounds

from unstemmed stocks.

^{1/} Beginning April 1940, factor changed from 1.12 to 1.11 to take into account lower redrying losses.

^{1/} For factors used in converting various weights, see table 10. For earlier data and for more detailed information on weight losses, see U. S. Department of Agriculture Circular 435, Tobacco Shrinkages and Losses in Weight in Handling and Storage, issued in July 1937.

million pounds respectively of the unstemmed stocks, and 1.12 to the balance. Beginning April 1940, a conversion factor of 1.11 was applied to all unstemmed stocks.

^{5/} Figures are sums of types 42,43, and 44, computed separately.
6/ Figures are sums of stocks in continental United States and Puerto Rico, computed separately.

If Figures are sums of types 54 and 55, computed separately.

8/ The years 1936 through 1939 represent the period during which occurred the transition from type 45 (filler) to type 56 (binder).

Table 11.-Stocks of leaf tobacco, by types and groups of grades, combining unstemmed and stemmed, in the United States, quarterly, 1938-42

1/ Under the 1942-43 Diversion Program, which became effective August 12, 1942, the Secretary of Agriculture authorized the purchase for byproducts uses of fire-cured (Types 21, 22, 23, and 24) and dark air-cured (Types 35 and 36) tobaccos, not to exceed 25,000,000 pounds at a total cost not to exceed \$1,750,000. Payments were made to manufacturers at a rate equal to the difference between the approved purchase price and 3.5 cents per pound on tobaccos of Types 21, 22, 23, 24, and 36, under a provision that such rate of payment should in no case exceed 7 cents per pound; and at a rate equal to the difference between the approved purchase price and 2.5 cents per pound for tobaccos of all other types, under a provision that such rate of payment should in no case exceed 6 cents per pound. Under an amendment to the original offer, effective April 19, 1943, the Secretary increased the payments which could be made to manufacturers, from the 7-cent maximum for Types 21, 22, 23, 24, and 36, and from the 6-cent maximum for all other types, to a 12.5-cent maximum for all types.

For Diversion Programs beginning March 1936, see tables 50-53 in the 1941 Annual Report on Tobacco Statistics, and for the 1942-43 Program, table 21 in the 1942 Report. No programs were in effect for 1939-40 and 1940-41.

^{2/} Storage-order basis. 3/ Farm-sales-weight basis.

farm-sales-weight basis.

4 Cost to the government. Average cost per pound is calculated on actual, not rounded, figures.

Subject to revision.

5/ Includes a small amount of Type 24.

^{1/} Redried weight.

Compiled from official records of the Commodity Credit Corporation.

^{2/} Acquired under contract to purchase, and under loan agreements.

^{3/} Includes tobacco repurchased or redeemed, sold to foreign governments and to the Food Distribution Administration for lend-lease, and other disposition, such as damage or loss due to storm, fire, flood, etc., and damage or weight loss in storage.

^{1/} The Lend-Lease Act became effective March 11, 1941. The first requisition for lendlease tobacco was made April 3, 1941, and the first purchase order was dated April 28, 1941.

^{2/} Net-packed weight or storage order. To convert to an approximate farm-sales-weight equivalent, increase flue-cured poundage by 12 percent, dark types by 15 percent, Burley by 11 percent, and Perique by 9 percent. Includes tobacco of the crops of 1939, 1940, 1941, 1942, and 1943.

^{3/} Includes packages of 1-3/4 oz., 2 oz., and 1/2 lb.

^{4/ 25-}pound cases.

^{5/} Approximate number of cases. Packed 6 boxes weighing 30 to 33 pounds net, to a case.

1/ Revised per capita consumption of tobacco products for earlier years is published in the

Annual Report on Tobacco Statistics, 1942, Table 26.

2/ Pounds of cigars and cigarettes represent unstemmed equivalent of tobacco used in the manufacture of these products. Both large and small cigars and large and small cigarettes are included. 3/ Tax-paid withdrawals of manufactured tobacco have been separated into chewing tobacco and

smoking tobacco in proportion to production of these two products.

4/ Preliminary. These years are not strictly comparable with earlier years as tax-free products sent to American forces in foreign countries are not included, and total population of the United States - including the American forces in foreign countries - has been used in determining per capita consumption.

Compiled from tax-paid withdrawals in the United States (including tax-paid withdrawals of tobacco products from the Philippine Islands and Puerto Rico) reported in monthly statements by the Commissioner of Internal Revenue, and July population estimates of the Bureau of the Census.

^{2/} Stocks shown represent those held by dealers end manufecturers who are required by law to file quarterly reports. Farm-sales weight is calculated by converting stemmed to unstemmed and storage weight to farm-sales weight, by allowing for normal losses of dirt, sand, moisture, and stem in handling and preparing tobacco.

^{1/} Due to war conditions, data on items covered in this table were not collected after 1939.

Compiled from United States Census of Manufactures.

^{2/} Establishments or plants which manufactured during the year products which were valued at less than \$5,000 are not included. The numbers of establishments shown in the census report fall below the corresponding numbers given in the report of the Commissioner of Internal Revenue, the differences being due to the following causes: (1) On the records of Internal Revenue the same establishment may appear two or more times - for exemple, as manufacturing cigars, as manufacturing cigarettes, and as manufacturing chewing tobacco - whereas for census purposes such an establishment would make only one report and would be classified according to its product of chief value. (2) Every dealer in scrap tobacco is required to register with the Bureau of Internal Revenue, whereas the Manufactures Census statistics do not include data for dealers. (3) Growers of Perique tobacco are required by the Bureau of Internal Revenue to register as manufacturers of tobacco, but are not covered by the Census of Manufactures. (4) A considerable number of manufacturers registered for taxation purposes made products valued at less than \$5,000, and therefore were not covered by the Census of Manufactures. For this reason, also, the quantities of tobacco products, as given in this table, are somewhat less than the corresponding quantities published by the Bureau of Internal Revenue.

^{3/} The item for wage earners is an average of the numbers reported for the several months of the year and includes both full-time and part-time workers. The quotient obtained by dividing the amount of wages by the average number of wage earners should not, therefore, be accepted as representing the average wage received by full-time wage earners.

^{4/} Figures for years prior to 1935 do not include cost of contract work.

^{5/} Value of products less cost of materials, supplies, fuel, purchased electric energy, and contract work.

Table 24.-Leaf tobacco used in the manufacture of cigars, cigarettes, and tobacco and snuff in the United States, 1937-41 1/

Year	:	Ci	gars	Ciga	rettes	:	Tobacco	: Total

7 Table 26.-Tax-paid withdrawals of large cigars, by months, 1941-43 - Continued

November 1, 1942. Under the old rate, the 2 classes, A and B, included those cigars selling for not more than 8 cents, while the new rate divided cigars within this price range into 4 classes, A, B, C, and D. The old classifications C, D, and E, correspond respectively to the 1/ For rates of Federal tex on tobacco products, see table 27. Clarsification of large cigers and rate of tex was changed, effective new E, F, and G.

2/ Comparable data not available.

Compiled from reports of the Commissioner of Internal Revenue.

Table 27.-Rates of Federal tax on tobacco products in the United States, as imposed by the Internal Revenue Acts of 1926 and 1942

Under Internal Revenue Act of 1926 1	of 1926 1/	: Under Internal Revenue Act of 1942 2/

	fraction thereof	:
Smoking and chewing tobacco and snuff	18 cents ner nound	. Smoking and chawing tobacco and snuff 18 cents ner bound

This provision 1/ As imposed by the Internal Revenue Act of February 26, 1926.

2/ As imposed by the Internal Revenue Act, effective November 1, 1942.

3/ Cigarettes weighing more than 3 mounds per 1,000 which are more than 6½ inches in length are taxable at the rate imposed on cigarettes weighing less than 3 mounds per 1,000, counting each 2-3/4 inches or fraction thereof of the length of each as one cigarette. This provision was first immosed by the Revenue Act of May 10, 1934, smending the Revenue Act of February 26, 1926.

4/ Rate effective July 1, 1940, changed tex on large cigarettes from \$7.20 to \$7.80, and on small cigarettes from \$3.00 to \$3.25.

Compiled from internal revenue laws of the United States.

^{1/} Rates are as of September 1, 1943.

Tobacco imported from the Philippine Islands is free of duty except that imports of the following items from the Philippines after December 31, 1939, in excess of the specified quotas shall pay the duty applicable to imports from countries other than Cuba:-Original quotas are for the calendar year 1940 and for each calendar year thereafter through the calendar year 1945, each of said quotas shall be the same as the corresponding quota for the immediately preceding calendar year, less 5 per centum of the corresponding original quota. The original quota for cigars (exclusive of cigarettes, cheroots, and paper cigars and cigarettes including wrappers) two hundred million cigars. The original quota for scrap tobacco, and stemmed and unstemmed filler tobacco described in paragraph 602 of the Tariff Act of 1930, four million five hundred thousand pounds. For the period January 1, 1946, through July 3, 1946, each of said quotas shall be one-half of the corresponding quota specified for the calendar year 1945.

^{3/} This rate was established by the Netherlands Trade Agreement, which became effective February 1, 1936. From that date until June 30, 1936, the rate on unstemmed wrapper tobacco was \$1.875, and on stemmed wrapper tobacco, \$2.525. The present reduced rates on this tobacco have been in effect since July 1, 1936.

Table 33 .- Tariff rates on tobacco and tobacco products imported into the United States; established by the Tariff Act of 1930, and subsequent changes - Cont'd

The rate was reduced under the Trade Agreement with Turkey, effective May 5, 1939. The rate was reduced under the Trade Agreement with the United Kingdom, effective January 1, 1939. Under the treaty of commercial reciprocity concluded between the United States and Cuba in 1902, which is continued in effect by section 316 of the Tariff Act of 1930, imports of Cuban tobacco into the United States are entitled to a reduction of 20 percent from the prevailing rate paid by any other country. The only exception to this rule was the Cuban Trade Agreement of September 3, 1934, which established specific rates for certain classes of tobacco; the tobacco concessions of this agreement were terminated March 16, 1936. The rates above listed for tobacco from Cuba have been computed by applying the 20 percent preferential reduction first to the rates established in the Tariff Act of 1930, and, for the present rate, to the reduced rates granted by existing Trade Agreements with other countries.

1/ From September 3, 1934, to March 16, 1936, the rate on unstemmed wrapper tobacco was \$1.50 per pound under the Cuban Agreement; the Agreement also provided that total imports of tobacco and tobacco products from Cuba were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during preceding year. With the termination of tobacco concessions in the Cuban Agreement, the Cuban duty became based on the new rates established under the Trade Agreement with the Netherlands. From February 1 until June 30, 1936, the Netherlands rate was \$1.875 per pound; after that date it was further reduced to \$1.50. The Cuban duty for both periods became 20 percent less that the Netherlands rate. The Supplementary Trade Agreement with Cuba, effective December 23, 1939, did not change this rate but the Second Supplementary Trade Agreement with Cuba, effective January 5, 1942, reduced it to 91 cents.

8/ Under the Netherlands Trade Agreement, effective February 1, 1936, the rate on stemmed wrapper tobacco was reduced to \$2.525 per pound for the period February 1 to June 30, after which a further reduction to \$2.15 per pound was made. The Cuban duty in the earlier period and at the present time, is 20 percent less than that established in the Netherlands agreement.

9/ Reduced as a result of the Trade Agreement with Turkey, effective May 5, 1939, in which the rate on

unstemmed cigarette leaf, n.s.p.f. became 30 cents per pound.

10/ Under the Cuban Agreement, from September 3, 1934, to March 16, 1936, the rate on unstemmed filler tobacco (including cigarette leaf n.s.p.f.) was set at 172 cents per pound, and on stemmed filler tobacco at 25 cents per pound; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The Supplemental Cuban agreement, effective December 23, 1939, restored the rates of the original Cuban Agreement on filler tobacco other than cigarette leaf stemmed and unstemmed. The Supplemental Cuban agreement limits the application of reduced rates on stemmed or unstemmed filler tobacco (other than cigarette leaf) and scrap tobacco to a total quantity of 22,000,000 pounds (unstemmed equivalent) in any calendar year, imports in excess of this quantity becoming subject to duty as if not mentioned in the Supplemental Agreement but not to rates higher than those in effect just prior to the original Cuban agreement. The Second Supplemental Cuban Agreement, effective January 5, 1942, reduced the rate on filler tobacco other than cigarette leaf unstemmed to 14 cents, and stemmed to 20 cents.

11/ Reduced as a result of the Trade Agreement with the United Kingdom, effective January 1, 1939.

12/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on scrap tobacco was set at 17 cents per pound, and on cigars and cheroots of all kinds at \$2.25 per pound plus 122 percent ad valorem; total imports of Cuban tobacco and tobacco products during this period were subject to a quota of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of tobacco concessions in the Cuban Agreement, the rates returned to the 1930 Tariff Act level. The Supplemental Cuban Agreement restored these rates to their level under the original Cuban agreement and established the quota on scrap and filler tobacco described in footnote 10/ The Second Supplementary Cuban Trade Agreement, effective January 5, 1942, reduced the rate on scrap tobacco from Cuba to 14 cents per pound; and on cigars and cheroots from Cuba to \$1.80 plus 10 percent ad valorem.

13/ Under the Cuban Trade Agreement, from September 3, 1934, to March 16, 1936, the rate on cigarettes was set at \$2.25 cents per pound plus 12 percent ad valorem, with a quota limit on total imports of tobacco and tobacco products from Cuba of 18 percent of tobacco used in manufacture of cigars in the United States during the preceding year. With the termination of the tobacco concessions in the Cuban Agreement, this rate returned to the 1930 Tariff Act level. The Trade Agreement with the United Kingdom, effective January 1, 1939, reduced the rate on cigarettes to \$2.25 cents per bound plus 122 percent ad valorem, and the present Cuban rate is derived from this latter duty.

^{1/} This table brings to date tables on foreign import duties on United States tobacco as published

4/ Practically all imports in this class.

Office of Foreign Agricultural Relations.

in earlier Annual Reports on Tobacco Statistics. United Kingdom is the only important country in which import duties on tobacco have been changed from those previously published in these reports.

2/ Conversions into United States currency made at official exchange rate for 1940-43 (b = \$4.035).

3/ Existing margin of preference to Empire countries was bound under trade agreement with the United Kingdom, effective January 1, 1939. Under the Ottaval Agreements Act, 1932, Empire leaf tobacco was assured a margin of preference over foreign leaf of 2s.02d. per pound until August 1942. This preference is equivalent to 41.2 cents per pound at the official exchange rate.
